# Preface

This course is written and run by General Products Ltd, the makers of Biblio-cloud.com.

# Chapter 1

## Getting started

This book accompanies the Try Programming for Publishers course which has been commissioned by the Oxford Publishing Group and which is next running on 20th January 2015 in Oxford, UK. However, you can read it on its own: it contains every single instruction you need to write and publish a Ruby on Rails application. So let's get started.
